To All Health Development Units

Dear Sir/Madam,

The Domiciliary Midwives Society is at present compiling a list of all midwives in New Zealand who are contracted to the Minister of Health to provide domiciliary midwifery services. We are at present negotiating with Ministry of Health officials over payments for services and other matters pertaining to the services we provide. It is important that the Society accurately reflects the domiciliary midwifery situation especially as to the number of midwives contracted.

I would be very grateful if you could forward the names and addresses of the midwives currently contracted for domiciliary work in your area whether they are currently practising or not. The Society will then contact those midwives and inform them of our efforts on their behalf.

Yours sincerely,

Bronwen Pelvin

Secretary.
