28.5.81

Dear Lyn:

Just a short note. I reckon it would take quite some time to sort out the 'few more figures', also these would all be on the stat forms which are supposed to be effective from 1 June 1980, but anyway, will pass on your request at our AGM which is this weekend.

Got a note from Thelma Fell. To date 25.5.81, her deliveries are 7, primip 1, transf 0, all normal short labours, babes all good apgars, 1 jaundice, no vit K given, Ergometrine once, all B/F.

By my rough estimate I reckon there have been 962 HBs since 1974 (planned), so we are going to need pretty close monitoring if we are going to make a song & dance about the 1000th.

Have you notified MSC that we have formed the Dom MWS Assn and will in future speak for ourselves and wish to be notified re any submissions on our behalf from NZNA? Maybe you should have some letterhead stationary & maybe Brebners would design something?  
Guess that's it for now,

Jean.

P.S. Did you get in touch with Jane Biddell, Kaetara who I hear is doing down there with the young.

J.
