Dear Lyn,

Sorry to be so long in
letting you have my statistics up to
30th April.

10 Home births. 9 Multips 1 Primig.

0 Transfers.

5 sutured lacerations 0 episiotomies

2 babies suctioned only.

1 PPH. did not cause shock. not transfused

2 given ecobolic.

All good appars.

All fully breast fed

No significant jaundice.

No pain relief.

1 smoker (unknown).

Statistics have been good
since also. No further PPH's.

I have 3 births booked for

cept which is well above the average
1 per month but nothing yet
or Oct so all in all will
probably only average out at the usual
in looking forward to an increase
next year or I may have to
commit myself to permanent weekend
hospital work to keep the household
going, especially with the new baby.

A new midwife has registered here
for our birth, and is really keen.
Fiona Barnett. She is presently
working full time in theatre &
hopes to ~~go~~ go overseas early
next year, but if that does not work
may take on weekend work as
dom. midwife next year.

Good to see the prompt reply
in the listener regarding P.K.U.
Regards to you & Jennifer.
Lynley McFarland.
