Dear Branches,

Auckland is guilty of sending out material without a covering letter stating with which branch it originated. A complete and embarrassing oversight. The committee delegated the job of sticking them all in envelopes and left it at that. Originally we had planned to send the submission on the nursing association submission on the Maternity Services Committee draft with the statistics, but they were not completed in time.

On the bright side, it does appear that changes made from the draft to the final copy mirror some criticisms. However, no excuses, we will do better from now on.
