

20073-291-137

Dear Sir, Madam,

My name is Shoyke Knudsen and I live on Great Barrier Island. I'm due to have a baby on approximately December 18th, at our house in Auckland, Mt Wellington - Otahuhu.

Mary Howlands is to be the Midwife, and Tony Heme the attending doctor.

I would like to join the Home Birth Association and would like to know if there are any ante-natal classes on at this time. We would be in Auckland the week ending in November, until the birth, approximately one month.

Also reading from the Homebirth Information pamphlet you are providing a package; about scans.

I was sent for a scan at 21 weeks, because, it was thought I was large for date, the trunk turned out to be a little longer than average but the rest were average size. However the placenta was still low at that time and they recommended another scan at 36-38 weeks. Is there any way of recognising this without a scan, if it has come up.

I've had a problem free, healthy pregnancy.

I'm also interested in information on immunisation.

Enclosed is a cheque for \$30, \$25 for registration
and \$5 for the information package.

My address is S. Knudsen
c/o Claris P.O.
Great Barrier Island.

I will be leaving the Barrier on 20th November.
This of reply is later than this
the address will be

205 Panama Rd.
Otahuhu.
Auckland

Thank You
Yours faithfully
S Knudsen

P.S

Cheque is on S. Jones, as I have recently married.
