1) why did I choose to have a home birth.

a) I choose to have a homebirth because I wanted to have a birth that was natural and free from interference and technology, that I feel the hospitals tend to use regardless of how you are managing with your birth yourself. By having a homebirth I was able to have my family and friends with me, and a birth that was completely natural.

2) where did you get information

a) I got my information on homebirth from a domestic midwife who is also a friend of the family. She informed me of what was available and how I could go about having my homebirth.

3.) Yes my homebirth was a wonderful experience.

I plan to have all my babies at home and would not ever consider having a hospital birth unless there was a medical problem with the baby or the midwife or doctor advised it for medical reasons. As long as I am healthy and the baby is healthy and growing I would always want a home birth.

Yours sincerely,  
B.A. Woods
